Art Unit: 1623

## **Priority**

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on July 21, 1999. It is noted, however, that applicant has not filed a certified copy of the French application as required by 35 U.S.C. 119(b). It is noted that while the examiner indicated in the office action mailed on September 30, 2003 that the priority papers have been received, the examiner is unable to locate the priority papers. Applicant has successfully met the requirements for 35 U.S.C 120.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

In claim 9, in the 5<sup>th</sup> line, the phrase "is selected among" has been deleted and replaced by the phrase "is selected from".

In claim 10, in the 2<sup>nd</sup> line, the phrase "is selected among" has been deleted and replaced by the phrase "is selected from".

The title has been deleted and replaced by the following title:

Art Unit: 1623

Methods for treating glutamate cytotoxicity with beta-naphthoguinone compounds

## Allowable Subject Matter

Claims 9-12 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Feuerstein et al. (US 6,384,069) is cited to show that the art recognizes that excessive release of glutamate is associated with various conditions and diseases such as Alzheimer's disease, hypoxia, hypoglycemia, stroke, etc. (see claim 1), and that methods of lowering glutamate levels are know to have efficacy in treating said diseases. Rosenberg (US 5,158,976 art of record) additionally teaches that glutamate toxicity is related to various diseases such as stroke, hypoglycemia, trauma, epilepsy, amyotrophic lateral sclerosis, hypoxia, ischemia, Parkinson's, and Alzheimer's disease (see column 1, lines 52-62) and teaches that their invention is generally used to treat patients affected by above diseases in which neuronal injury or death is caused by the toxic levels of glutamate.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest the use of the beta-naphthoquinone compounds in treating diseases associated with excessive release of glutamate. The prior art teaches the use of the betanaphthoquinone compounds as vasoprotective agents, and one of ordinary skill in the art would

Art Unit: 1623

not find it obvious nor be motivated to use an agent which is known to be a vasoprotective agent in a method for treating diseases associated with excessive glutamate release.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Traviss C. McIntosh whose telephone number is 571-272-0657. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
